

# The Battle of the Neighborhoods

By: Lu Yang

Jan 3, 2020

## Table of Contents

- Introduction
- Data Acquisition and Cleaning
- Exploratory Data Analysis
- Data Visualization and Analysis
- Conclusion
- Future Work

# Introduction

- Immigrants to the US
- Chinese immigrants increasing
- Queens borough with numerous Asian people
- New immigrants need help and directions
- Government helps new immigrants

Open a new  
Chinese restaurant?  
Where?

## Problem Definition

- Where to open a new Chinese restaurant in the neighborhoods of Queens, New York City

## Target Audience

- New immigrants
- Government funded multicultural associations

## Data Acquisition and Cleaning – Data Source

- Venues categories from Foursquare
- Population of neighborhoods of Queens borough  
(<https://www.health.ny.gov/statistics/cancer/registry/appendix/neighborhoodpop.htm> )

- Venues categories from Foursquare

[illegible][illegible]

- Venues categories from Foursquare

[illegible]

# Data Acquisition and Cleaning – Data Cleaning

- Venues categories from Foursquare and population from Department of Health

(4)

[illegible]

## Exploratory Data Analysis

- We would hope to choose one neighborhood
  - (1) Big population
  - (2) Heavily populated by Chinese/east Asian people
  - (3) Relatively small number of existing Chinese restaurants in neighborhoods satisfying (2)
- How do Queens's neighborhoods look like?

## Exploratory Data Analysis

- Hmm...we need more knowledge. The wiki of demographics of Queens says:

Numerous Asians live in:

- Flushing
- Little Neck
- Bayside
- Fresh Meadows
- Jamaica Estates
- Elmhurst
- Woodside
- Richmond Hill
- Ozone Park

- Tweak the dataset again

[illegible]

# Exploratory Data Analysis

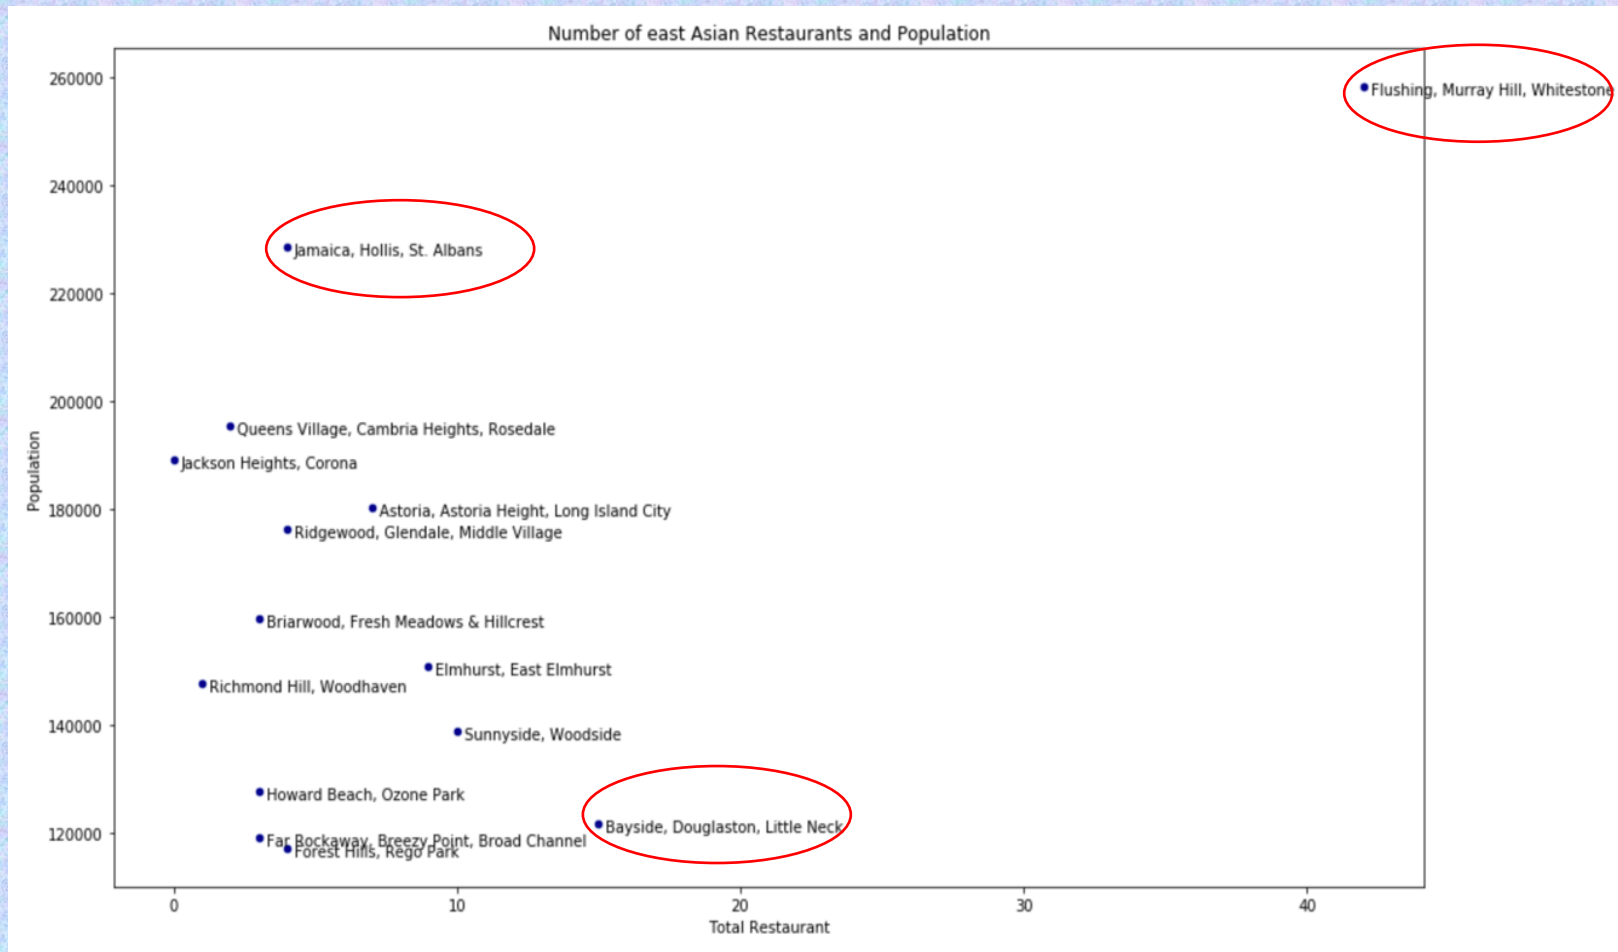

- Still need to add one more column to the dataset

Neighborhood	Cantonese Restaurant	Chinese Restaurant	Dim Sum Restaurant	Dumpling Restaurant	Filipino Restaurant	Hotpot Restaurant	Indonesian Restaurant	Japanese Restaurant	Korean Restaurant	Malay Restaurant	Shanghai Restaurant	Szechuan Restaurant	Taiwanese Restaurant	Vietnamese Restaurant	Population	Total Restaurant	Chinese/Total
Astoria, Astoria Height, Long Island City	0	4	0	0	0	0	0	2	1	0	0	0	0	0	180171	7	0.57
Jackson Heights, Corona	0	0	0	0	0	0	0	0	0	0	0	0	0	0	189150	0	0.00
Flushing, Murray Hill, Whitestone	1	3	1	1	0	6	0	1	26	1	1	1	0	0	258315	42	0.07
Bayside, Douglaston, Little Neck	1	6	0	0	0	0	0	1	4	0	1	0	0	2	121623	15	0.40
Queens Village, Cambria Heights, Rosedale	0	2	0	0	0	0	0	0	0	0	0	0	0	0	195531	2	1.00
Briarwood, Fresh Meadows & Hillcrest	0	2	1	0	0	0	0	0	0	0	0	0	0	0	159617	3	0.67
Elmhurst, East Elmhurst	0	4	0	0	0	1	1	0	0	1	0	0	0	2	150886	9	0.44
Forest Hills, Rego Park	0	2	0	0	0	0	0	1	0	0	1	0	0	0	117027	4	0.50

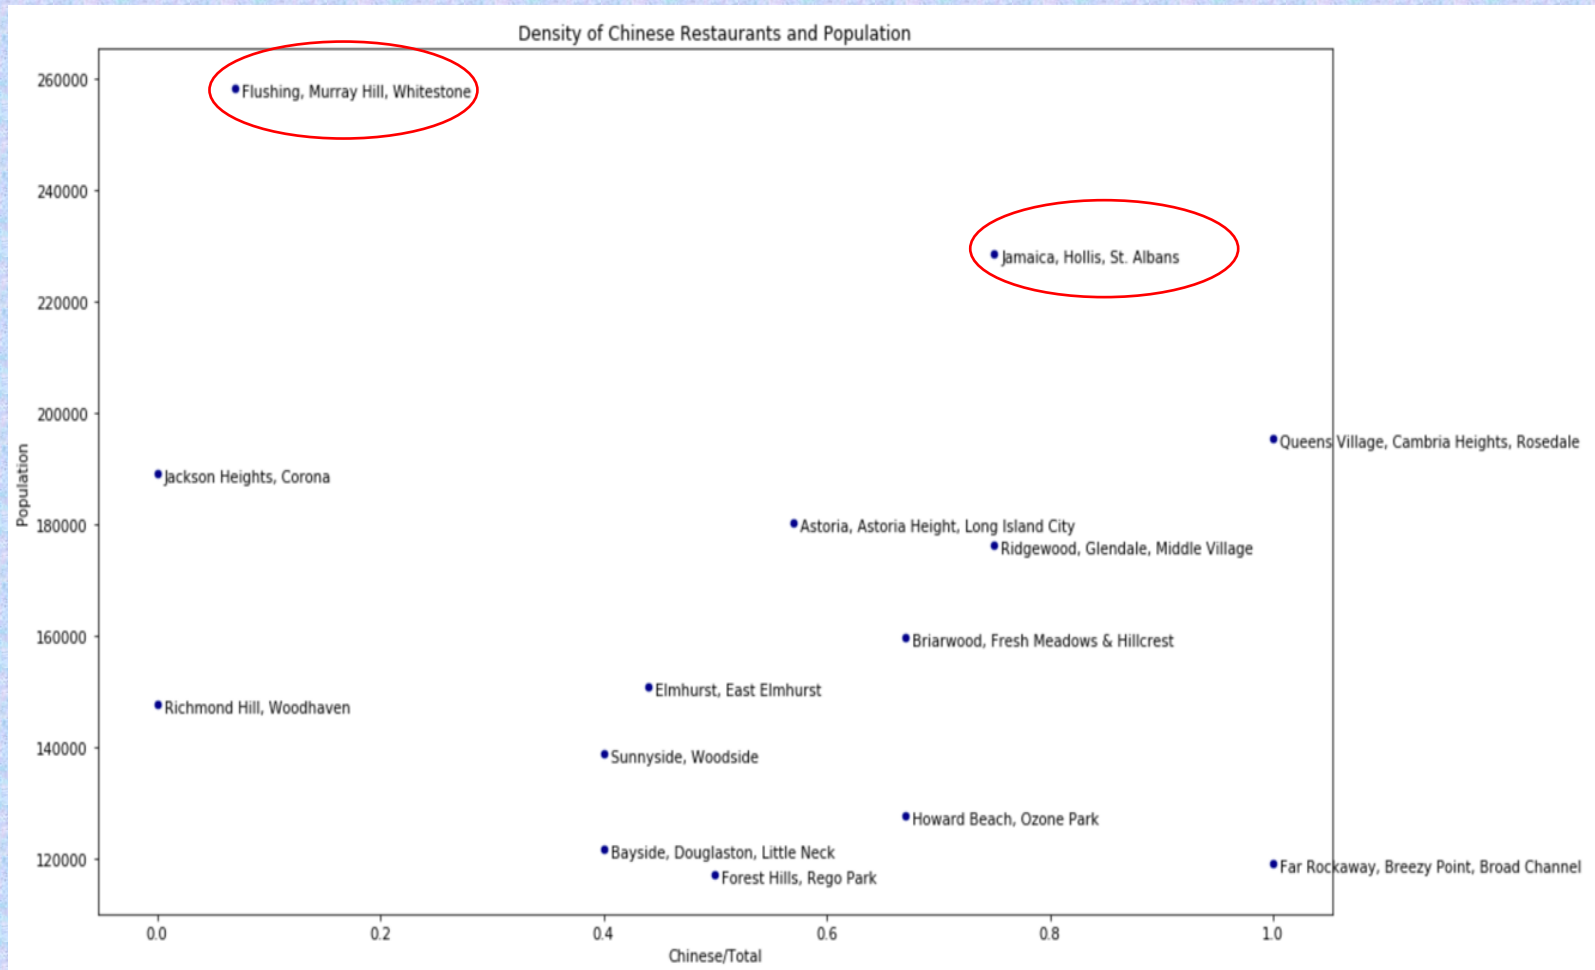

# Data Visualization and Analysis

# Data Visualization and Analysis

# Data Visualization and Analysis

## Conclusion

- Data from two data sources
- Data cleaning, exploration, and visualization
- Data analysis using scattered plots
- The neighborhood 'Flushing, Murray Hill, and Whitestone' is recommended

## Future Work

- Collect more data
  - Revenue of both the Chinese and east Asian restaurants
  - Numbers of Chinese population in Queens's neighborhoods
  - Demographics of visitors to Queens borough
- More data understanding, data cleaning, **model training**, data visualization, and analysis
